Kravitz Lab Publication list

Fruit fly

likely neurohormone J Neurosci 4: 1300-1311.

Battelle BA, Kravitz EA and Stieve H (1979) Neurotransmitter synthesis in Limulus
ventral nerve photoreceptors. Experientia 35: 778-780.

Barker DL, Molinoff PB and Kravitz EA (1972) Octopamine in the lobster nervous

Kravitz EA (1967) Acetylcholine, gamma-aminobutyric acid and glutamic acid:
Physiological and chemical studies related to their roles as neurotransmitter agents in
The Neurosciences - A Study Program eds GC Quarton, T.Melnechuk and FO

Hall ZW and Kravitz EA (1967) The metabolism of gamma-aminobutyric acid in the
lobster nervous system II. Succinic semialdehyde dehydrogenase. J Neurochem 14:
55-61.

Hall ZW and Kravitz EA (1967) The metabolism of gamma-aminobutyric acid
(GABA) in the lobster nervous system I. GABA-glutamic transaminase. J Neurochem 14:
45-54.

Otsuka M, Iversen LL, Hall ZW and Kravitz EA (1966) Release of gamma-

Iversen LL and Kravitz EA (1966) Sodium dependence of transmitter uptake at
adrenergic nerve terminals Mol Pharmacol 2: 360-362.

Woodworth RC and Kravitz EA (1965) An adjustable liquid filter for the middle
ultraviolet: Isolation of the 2804-A line of Hg for detecting proteins in solution.

Kravitz EA, Molinoff PB and Hall ZW (1965) A comparison of the enzymes and
substrates of gamma-aminobutyric acid metabolism in lobster excitatory and

Kravitz EA and Potter DD (1965) A further study of the distribution of gamma-
aminobutyric acid between excitatory and inhibitory axons of the lobster. J Neurochem 12:
323-328.

Kravitz EA, Kuffler SW and Potter DD (1963) Gamma-aminobutyric acid and other
blocking compounds in Crustacea. III. Their relative concentrations in separated

Kravitz EA, Kuffler SW, Potter DD and van Gelder NM (1963) Gamma-
aminobutyric acid and other blocking compounds in Crustacea. II. Peripheral

Kravitz EA (1962) Enzymic formation of gamma-aminobutyric acid in the

Kravitz EA, Potter DD and van Gelder NM (1962) Gamma-aminobutyric acid
distribution in the lobster nervous system: CNS, peripheral nerves and isolated motor
and inhibitory axons. Biochem and Biophys Res Comm 7: 231-236.

Kravitz EA, Potter DD and van Gelder NM (1962) Gamma-aminobutyric acid and
