

**Professor of Ambulatory Care and Prevention  
Harvard Medical School**

The Department of Ambulatory Care and Prevention (DACP), a joint academic department of Harvard Medical School and Harvard Pilgrim Health Care, invites applications for the position of Professor of Ambulatory Care and Prevention. The DACP seeks to recruit a leader in preventive medicine with excellent credentials as an investigator and/or public health practitioner to assume a key role in guiding the department's future. This individual will develop and lead a prevention research agenda that builds on the department's expertise and access to health plans' defined populations and delivery systems, and the department's existing relationships with national, state, and local public health agencies. It is anticipated that the individual will foster collaborations between the academic community, the public health sector, and the private health care delivery system. This individual will also play an important role in teaching at Harvard Medical School.

Candidates should have broad knowledge of public health systems, including the ways in which they set priorities and the methods by which they operate. DACP offers opportunities to work with an interdisciplinary faculty in a collegial and collaborative environment, with strong ties to research and teaching networks locally, nationally and internationally.

Please send letters of application and curriculum vitae to:

Richard Platt, M.D.  
Chair, Search Committee  
Professor and Chair  
Department of Ambulatory Care and Prevention  
Harvard Medical School/Harvard Pilgrim Health Care  
133 Brookline Ave., Sixth Floor  
Boston, MA 02215

*Harvard Medical School and Harvard Pilgrim HealthCare are equal  
opportunity/affirmative action employers.*
