

Children's Hospital Boston

HARVARD MEDICAL SCHOOL

**Director of Pediatric Cardiac Bioengineering Initiative**

Professor of Surgery  
Children's Hospital Boston  
Harvard Medical School

Children's Hospital Boston is searching for a Director to create a new Program in Pediatric Cardiac Bioengineering. The candidate is expected to establish an outstanding independent basic or translational research program focused in bioengineering and biomechanics and oversee a series of junior faculty. He/she would work closely with the other Department heads and the Chiefs of Service of Clinical Departments to develop this new programmatic initiative.

The successful candidate will have an M.D., Ph.D., or M.D./Ph.D., substantial experience and training in bioengineering, significant experience in research administration, demonstrated leadership skills, and a strong desire to pursue innovative research at HMS. Qualifications and experience should be commensurate with a full-time faculty appointment at Harvard Medical School at the Full Professor level in the Department of Surgery.

**Letters of interest, a curriculum vitae and summary of research interests may be submitted to: [pedro.delnido@cardio.chboston.org](mailto:pedro.delnido@cardio.chboston.org)**

Pedro del Nido, M.D., Committee Chair
