

2007 Spring Symposium

The cell biology and immunology of host defense at mucosal surfaces

In celebration of the career of Dr. Marian Neutra

TUESDAY, APRIL 10, 2007

Enders Auditorium, Children's Hospital Boston

- 1:45 p.m. *Welcome* by Wayne I. Lencer, M.D.
Co-Director, Harvard Digestive Diseases Center (HDDC)
- 1:50 p.m. *Mucosal immunology and host defense – basic principles*
Jean-Pierre Kraehenbuhl, M.D.
University of Lausanne, Switzerland
- 2:15 p.m. *Shigella at mucosal surfaces: the Yin and Yang of innate immunity*
Philippe Sansonetti, M.D.
The Pasteur Institute, Paris
- 2:45 p.m. *The brush border cytoskeleton in intestinal defense and inflammation*
Mark Mooseker, Ph.D.
Yale University
- 3:15 p.m. Break
- 3:35 p.m. *A COG in the Golgi Machine - insights into human congenital disorders of glycosylation (CDG) from somatic cell genetics*
Monty Krieger, Ph.D.
Massachusetts Institute of Technology
- 4:05 p.m. *Actin as a host target: Vibrio cholerae Type III and VI secretion systems*
John Mekalanos, Ph.D.
Harvard Medical School
- 4:35 p.m. *Lymphocyte traffic in lymphoid tissues and the intestine*
Ulrich von Andrian, M.D., Ph.D.
Harvard Medical School

Sponsored by:
The Harvard Digestive Diseases Center (HDDC)
