## Office for Diversity and Community Partnership

The Office for Diversity and Community Partnership (DCP) focuses on two broad areas at Harvard Medical School: minority faculty development and educational outreach. The DCP Office aims to ensure that Harvard Medical School truly reflects the community it serves by promoting increased recruitment, retention and advancement of underrepresented minority faculty at Harvard Medical School, overseeing all diversity activities involving faculty, trainees, students and staff, and coordinating partnerships with community groups and local schools. In addition, DCP's work includes research and technical assistance that lead to national, regional and local strategies that support workforce diversity and inclusion in the biomedical sciences.

## Minority Faculty Development Program

Established in 1990, the DCP Minority Faculty Development Program seeks to: increase the number of minority faculty at Harvard Medical School; increase the number of minority physicians and scientists who undertake their post-graduate medical education at one of the 18 Harvard Medical School-affiliated institutions; establish model programs for the development of minority faculty with an emphasis on mentoring and leadership; and create programs designed to reach out to the pre-college and college populations with the goal of bringing outstanding, underrepresented minority students into the pipeline.

## Harvard Catalyst The Harvard Clinical and Translational Science Center (CTSC) Program for Faculty Development and Diversity (PFDD)

The goals of PFDD are to: provide increased awareness, visibility and understanding of clinical translational (C/T) issues among minority faculty and trainees; enhance faculty diversity through improved recruitment, retention and advancement of individuals currently underrepresented in the biomedical, clinical, and social sciences; enhance student, trainee and fellow recruitment to Harvard Catalyst CTSC training programs, particularly individuals from racial and ethnic groups that are underrepresented in health-related sciences; and expand science research training opportunities to pre-professional school minority and disadvantaged students to increase their interest in research and health-related careers, particularly C/T research careers.

## Funding

These programs are partially funded by a Cooperative Agreement between Harvard Medical School, Minority Faculty Development Program and Office of Minority Health, Department of Health and Human Services, Cooperative Agreement No. MPCMP051007, and Harvard Catalyst The Harvard Clinical and Translational Science Center, Grant No. 5 UL1 RR025758-02.
